

INCOME WITH GROWTH (TAXABLE)

THIRD QUARTER 2024

OBJECTIVE

Primarily focused on reliable income with a secondary focus on growth.

INVESTMENT PHILOSOPHY

Asset allocation is a portfolio management process where various asset classes are combined in one portfolio. Properly implemented, asset allocation is a time-tested approach that addresses risk through diversification. The Confluence approach to asset allocation is different than traditional asset allocation approaches which rely on long-term historical averages for strategic capital market assumptions. Confluence recognizes that risk levels and return potential rise and fall over market and economic cycles. Therefore, we apply an adaptive process in which the Confluence team estimates the performance of 12 different asset classes in terms of risk, return, and yield looking forward 3 years. This cyclical approach is not market *timing*. Rather, the intention is to remain within an acceptable risk profile, while changing the asset class mix to optimize return potential. We may adjust allocations in much shorter time frames, depending upon changing views of the marketplace and economy. Alternately, we may abstain from making significant allocation adjustments if we believe the existing posture remains optimal. The process may involve somewhat higher turnover than a more static strategic program, but usually involves less trading relative to tactical approaches.

The asset allocation portfolios utilize exchange-traded funds (ETFs). We may use ETFs that allow us to focus on or avoid particular industry sectors, bond maturities, commodities, or countries.

OVERVIEW

- ♦ Focus is oriented toward reliable income, moderate volatility, long-term growth, and principal preservation
- Allocations in fixed income asset classes, usually with an emphasis on U.S. investment-grade fixed income
- Portfolio may include real estate, equities, commodities, or other asset classes that contribute growth potential and diversification benefits
- Profile similar to that of a diversified bond portfolio alongside an equity allocation
- ♦ Appropriate for investors with a conservative risk tolerance
- ♦ Strategy assets: \$462.0 million¹
 - 1 Total strategy assets include assets under management (AUM) and assets under advisement (AUA). As of 12/31/23, AUM = \$58.6 million and AUA = \$403.4 million.

OVERALL MORNINGSTAR RATING™

Among 436 separate accounts in the Moderately Conservative Allocation category. This separate account was rated 5 stars/436 separate accounts (3 years), 5 stars/382 separate accounts (5 years), 5 stars/233 separate accounts (10 years) based on risk-adjusted returns. As of 3/31/24. 7

CURRENT PORTFOLIO²

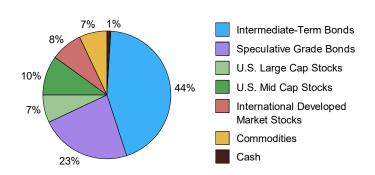

(As of 7/16/2024 rebalance)

See GIPS Report on pages 2-3.

CHARACTERISTICS	
Weighted SEC Yield	4.0%
Volatility Ceiling	10.0%
Number of Securities	16
Annual Turnover (3-Year Rolling as of 12/31/23)	103%

5 LARGEST HOLDINGS	
$SPDR^{@}Portfolio$ Mortgage Backed Bond ETF - $SPMB$	20.8%
iShares BB Rated Corporate Bond ETF - HYBB	17.0%
iShares iBonds Dec 2029 Term Corporate ETF - IBDU	8.7%
iShares iBonds Dec 2028 Term Treasury ETF - IBTI	8.4%
SPDR [®] Gold MiniShares ETF - GLDM	7.0%

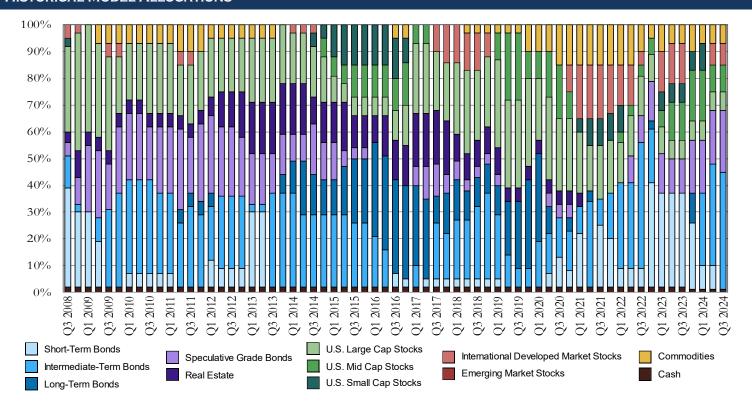

ASSET ALLOCATION

RECENT PORTFOLIO CHANGES³

Income with Growth saw adjustments primarily within fixed income, where we exited short-term bonds and the proceeds were allocated to intermediate-term corporates and Treasurys, with the overweight to MBS retained. With no recession anticipated, we increased the allocation to speculative grade bonds and maintained the focus on higher-quality BB-rated bonds. Congruently, US large cap stocks are now even-weight growth/value and the overweight remains in Aerospace & Defense. US mid-cap stocks lean toward growth, with an emphasis on quality and an overweight in uranium producers. International developed stocks remain attractive due to valuation discounts relative to US large caps, with a sustained country bias to Japan. Gold continues to act as a haven amid elevated geopolitical risks, further supported by global central bank purchases.

HISTORICAL MODEL ALLOCATIONS

PERFORMANCE COMPOSITE RETURNS⁴ (For Periods Ending June 30, 2024)

DISCLOSURES

- ²Current Portfolio—Information presented reflects wrap account composites with taxable income (if applicable). Asset allocations shown represent the individual ETFs used in the model portfolios as of 7/16/24 and do not represent the precise allocation of assets in an actual client account. Asset allocation in client accounts may vary based on individual client considerations and market fluctuations. The investments held by the portfolio are not guaranteed and do carry a risk of loss of principal. Each asset class has specific risks associated with it and no specific asset class can prevent a loss of capital in market downturns. Individual client portfolios may differ, sometimes significantly, from these listings. Yield data source: Morningstar. 30-day SEC yield of the model portfolio as of 7/16/24. Annual turnover 3-year rolling calculated from sample accounts for periods ending 12/31/2023.
- ³Recent Portfolio Changes—The investment or strategy discussed may not be suitable for all investors. Investors must make their own decisions based on their specific investment objectives and financial circumstances.
- ⁴Performance Composite Returns—Confluence Investment Management LLC claims compliance with the Global investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Confluence Investment Management LLC has been independently verified for the periods August 1, 2008, through December 31, 2023. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards.

Verification provides assurance on whether the firm's policies and procedures related to composite maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Income Taxable with Growth-Plus strategy was incepted on December 1, 2008, and the Income Taxable with Growth-Plus Composite was created on December 1, 2008. Confluence Investment Management LLC is an independent registered investment adviser. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of all fees and include the reinvestment of all income.

- ⁵ Pure gross returns are shown as supplemental information to the disclosures required by the GIPS® standards.
- ⁶ Net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. This fee includes brokerage commissions, portfolio management, consulting services and custodial services. The Confluence fee schedule for this composite: 0.40% on the first \$500,000; 0.35% on the next \$500,000; 0.30% over \$1,000,000. There are no incentive fees. Clients pay an all-inclusive fee based on a percentage of assets under management. The collection of fees produces a compounding effect on the total rate of return net of fees. Bundled fee accounts make up 100% of the composite for all periods. Actual investment advisory fees incurred by clients may vary. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor.

A complete list of composite descriptions is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The annual composite dispersion is an equal-weighted standard deviation, using gross-of-fee returns, calculated for the accounts in the composite for the entire year. The three-year annualized standard deviation measures the variability of the composite gross returns over the preceding 36-month period. The Income Taxable with Growth-Plus Composite contains fully discretionary Income Taxable with Growth-Plus wrap accounts. The Income Taxable with Growth strategy is implemented using ETFs and the investment objective is the pursuit of nominal returns (yield and growth) in excess of inflation, subject to the limitations of the risk constraint for the Income Taxable with Growth strategy. Although the portfolio typically favors an allocation to taxable fixed income asset classes, a smaller portion of the portfolio may include real estate, equities, commodities or other asset classes. These allocations provide an aspect of growth potential, along with diversification benefits. This portfolio may be appropriate for investors with a conservative risk tolerance.

The benchmark was changed retroactively on 1/1/24 due to wider market adoption and transparency of the underlying constituents. The custom benchmark prior to 1/1/24 was calculated monthly and consisted of: S&P 500 40% and 60% ICE BofA U.S. Corporate, Government, and Mortgage Bond Index. Inflation was removed prior to 1/1/24 and had been provided as additional information and was represented by the U.S. 5-year TIP breakeven spread.

- **Results shown for the year 2008 represent partial period performance from December 1, 2008, through December 31, 2008. N/A-Composite Dispersion: Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year. N/A-3yr Std Dev: Composite does not have 3 years of monthly performance history.
- ⁷ Overall Morningstar Rating™—Information provided is for educational/illustrative purposes only and should not be construed as individualized advice, recommendation, or endorsement of any investment strategy. Information is not intended to forecast or predict future performance. Past performance is no guarantee of future results. Ratings are objective, based entirely on a mathematical evaluation of past performance, and based on gross-of-fees performance (before deduction of advisory fees). Net performance information is available on the Confluence website. Ratings should not be considered a buy or sell recommendation. Confluence provides compensation to Morningstar, Inc. for use of their analytics systems/ database as well as for permission to publish these ratings.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

The Morningstar Rating[™], or "star rating," is calculated for separate accounts with at least a three-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. As of 3/31/2024.
